EXPERIENCE

Tech Lead
Sharkhood Tech ↗
02/2026 - Present

- Owned technical direction end to end: defined the stack, architecture standards, and delivery process across web and backend teams.
- Architected and shipped a self-hosted RAG platform; document ingestion and chunking, vector storage and retrieval, and grounded answer generation over private company data.
- Selected and benchmarked the model stack: mxbai-embed-large-v1 for embeddings and mistral-7b-openorca as the generative LLM, tuning chunk size, retrieval depth, and prompt structure for answer accuracy and latency.
- Built backend services in NestJS with MongoDB and PostgreSQL, using PostgreSQL for relational and vector workloads and MongoDB for unstructured content; delivered the frontend in Angular.
- Led hiring, Established code review and quality standards; Mentored engineers through 1:1s and technical guidance;
- ran sprint planning, estimation, and prioritization with stakeholders.
- Made and documented architecture decisions, balancing self-hosted infrastructure cost against performance and data privacy requirements.

Senior Full Stack Engineer
dailypoint ↗
02/2025 - 01/2026

- Led modernization of a 20-year legacy CRM built on AngularJS and .NET Razor Pages as the lead full stack developer.
- Defined a migration path to a modern stack and executed a phased replacement of AngularJS components.
- Designed and implemented a reusable, Bootstrap-like UI library from scratch, adopted across modules and apps.
- Refactored .NET Razor Pages integrations to improve maintainability and performance; resolved cross-module/API integration issues.

Senior Full Stack Engineer
Top Spots FZE ↗
01/2022 - 01/2025

- Improved UX and boosted site speed by 65% through responsive design enhancements.
- Integrated key third-party APIs: N-Genius, Google Maps, Firebase, and Dubai Park.
- Set up an AI chat system on our company servers and

SUMMARY

Technical lead with 11+ years shipping software across web, mobile, and cloud; owning architecture, standards, and delivery across full engineering teams. My work tends to land on two kinds of hard problems: moving large legacy systems forward without stopping the business running on top of them, and putting AI into production where the data isn't allowed to leave the building, self-hosted RAG platforms and assistants deployed for banking and enterprise clients. Angular and Next.js up front, NestJS, Node, and .NET Core behind, PostgreSQL and MongoDB underneath. I set the engineering bar, mentor the people who meet it, and stay close enough to the code to defend every decision I make.

SKILLS

NodeJS / NestJS / Fastify	Expert
Angular / Ionic / NativeScript	Expert
Technical leadership & mentoring	Expert
RAG / Vector databases	Advanced
Embeddings / Model evaluation	Advanced
React / NextJS	Advanced
.NET Core	Advanced
Ollama / LLM Studio	Advanced
S3 / Azure Blob Storage	Advanced
Stripe / PayPal / GPay	Advanced
Firebase	Advanced
CI / CD / SaaS	Advanced
GitHub / GitLab / Bitbucket	Advanced
AWS / Vercel / IIS / Azure	Advanced
WebSockets / MQTT.	Advanced
Third-party API integrations	Advanced
OpenAI / HeyGen / 11 Labs	Advanced
Cross-platform mobile application development	Advanced
SQL & NoSQL databases	Advanced

wrapped it with our own API so it runs on its own; supports text, voice, and avatars using OpenAI and Ollama.
- Trained the assistant on our company data to keep answers private and useful; integrated 11 Labs and HeyGen.
- Shipped the AI assistant to production for a banking client, tailoring it to their data and security requirements as a client-facing deployment.
- Built a supplier dashboard where each supplier has its own profile and payment details, with onboarding, updates, and payouts managed centrally from our admin panel.

Lead Full Stack Developer
ShoofBook LLC ↗
01/2020 - 01/2022

- Led end-to-end development lifecycle, from planning to deployment.
- Architected a scalable platform for high-volume, real-time user content.
- Built a responsive UI with PrimeNG and Angular for seamless user interactions.
- Used Redis caching to significantly reduce load times and boost performance.
- Created a custom search algorithm to enhance accuracy and speed.
- Enabled real-time updates and notifications with dynamic data handling.
- Collaborated on AI-driven features and SaaS platform scalability, contributing to performance optimization and real-time feature delivery in cloud-based systems.

Full Stack Developer
TechnoWave FZ ↗
01/2019 - 01/2020

- Built dynamic, responsive front-end apps using Angular (v7–15) to boost UI performance.
- Engineered scalable, secure backends with .NET Core and ExpressJS for efficient data handling.
- Managed Oracle, MySQL, and MongoDB databases, optimizing data storage and queries.
- Delivered cross-platform mobile apps using NativeScript and Ionic.
- Designed sleek, intuitive UIs to enhance user experience and engagement.
- Lead developer of UberME, a luxury car rental app built with Flutter, featuring advanced search, map view, booking flows, and demo mode for seamless user interaction.

Full Stack Engineer
Al Andalus University for Medical Sciences ↗
03/2017 - 12/2018

- Taught web programming with a focus on modern full-stack technologies.
- Built responsive front-end apps using AngularJS and Ionic for mobile compatibility.
- Managed university servers and systems to ensure performance and security.
- Developed RESTful APIs using NodeJS and .NET Core, integrated with Oracle for efficient backend operations.

MongoDB / PostgreSQL / MySQL / Prisma	Advanced
Server-side rendering (SSR)	Advanced
Authentication (OAuth, JWT)	Advanced
Microservices architecture	Expert
jQuery / AJAX	Expert
Docker	Intermediate
HTML5 / CSS3 / JS (ES6+) / TS	Expert
Coding	Expert
Web Applications	Expert
Mobile Applications	Expert

LANGUAGES

Arabic	Native
English	Fluent

EDUCATION

Masters Web Science , Web Science
Syrian Virtual University SVU
01/2022 - Present
Master's Degree

- Data-Driven Development: Boosted app processing speed by 40% with optimized data structures.
- Machine Learning: Created a personalized recommendation system to enhance user engagement.
- Industry Collaboration: Designed a scalable e-commerce platform with real-time features.

Information Technology
Jami't Al-Ba'ath
01/2013 - 01/2017
Bachelor's degree

- Gained strong foundations in algorithms, data structures, and distributed systems.
- Conducted big data analysis using Hadoop, Spark, and MapReduce.
- Applied system architecture knowledge to optimize data processing and management.

Entrepreneurship and Business Skills Training
Jami't Al-Ba'ath
05/2015 - 08/2015

- Conducted market research to identify target audiences and trends.
- Business Model Development: Learned to create scalable business models.

Software Developer

Scase ↗

04/2015 - 09/2017

- Solid foundation in software engineering fundamentals—deployment, OOAD, and RAD.
- Developed RESTful APIs in .NET Core and integrated Oracle to streamline backend data handling.
- Built AngularJS web applications and RESTful services with Node.js.

CERTIFICATES

Experience Certificates Top Spots Dubai

01/2022 - 07/2025

Experience Certificates ShoofBook LLC

01/2020 - 01/2022

Experience Certificates TechnoWave

01/2019 - 01/2020

Bachelor's Degree in Informatics Engineering, specializing in Software Engineering and Information Systems

01/2013 - 01/2018
